EDUCATION

TKR COLLEGE OF ENNG AND TECHNOLOGY,
BTECH (GRADUATE) computer sciecne and data science
2021 – 2024 | Hyderabad,Telangana,India
CGPA - 8.0

TKR COLLEGE OF ENGG AND TECHNOLOGY,
DIPLOMA Eletronics communication and engineering (ECE)
2018 – 2021 | Hyderabad,Telangana,India
CGPA - 9.11

ADARSHA VIDYALAYAM HIGH SCHOOL, 10TH CLASS
2017 – 2018 | Siddipet,Telangana,India
CGPA - 8.5

SKILLS

Programming & Scripting: Yaml, Bash, PowerShell, Python, SQL,HTML,CSS,Java script,Terraform,Fast Api

CI/CD & Version Control: GitLab, GitLab CI/CD, Azure DevOps Pipelines, Git, Pipeline Automation, Approval Gates

Cloud: Microsoft Azure, AKS, [Azure Container Registry, Virtual Network, Storage Accounts, Azure Database for PostgreSQL]

IaC: Terraform, Azure Resource Provisioning, Terraform Modules

Containers: Docker, Kubernetes, Dockerfile Optimization, Rolling Updates, Rollbacks, [Helm, kubectl]

Monitoring & Logging: Azure Monitor, Log Analytics Workspace, Grafana, Grafana Alloy, Dashboards, Alerting, [KQL, Prometheus, Loki]

Database: PostgreSQL, Backups, Access Management, Upgrades

ITSM/Release: ServiceNow (GSNOW), Atlas, Change Management, Incident Management, Production Releases

AI / GenAI: Azure OpenAI, [Prompt Engineering Basics, REST APIs]

Security: [Azure Key Vault, Azure AD, Azure RBAC, Pipeline Security Scans]

Operating Systems: [Linux, Windows]

Soft Skills: Cross-team Collaboration, Troubleshooting, Root Cause Analysis, Documentation

PROFESSIONAL SUMMARY

DevOps Engineer with 2 years of hands-on experience at UBS, delivering and supporting applications in a large-scale, highly regulated banking environment. Microsoft certified in Azure Fundamentals (AZ-900) and Azure AI Fundamentals (AI-900). Skilled in Kubernetes, Docker, Grafana, CI/CD pipelines, and Azure cloud services, with a focus on automation, reliability, and secure, well-monitored deployments.

WORK EXPERIENCE

Hays India Private Limited | Client: UBS (Union Bank of Switzerland), Tech DevOps Engineer
Jan 2025 – Present | Hyderabad,Telangana,India

- Set up **GitLab** and built **GitLab CI/CD** and **Azure DevOps YAML pipelines** to automate **build, test, security scan, and deployment** across **different applications**.
- Provisioned **Azure resources with Terraform**, with pipelines that run **plan and apply** automatically for **repeatable infrastructure**.
- Created **Dockerfiles** and managed **AKS** deployments, including **scaling, rolling updates, rollbacks, and troubleshooting**.
- **Upgraded** pipeline files, Terraform modules, Dockerfiles, and manifests to keep UBS environments **current and compliant**.
- Maintained **PostgreSQL** databases on Azure, including **[backups, access management, monitoring, upgrades]**.
- Used **Azure Monitor** and **Log Analytics** [with **KQL**] to manage logs and storage and find **root causes** of production issues.
- Built **Grafana dashboards** and used **Grafana Alloy** to collect **metrics, logs, and traces** from Kubernetes.
- Managed **changes and incidents** in **ServiceNow (GSNOW)** and ran **production releases** through **Atlas** with dev, QA, and ops teams
- Improved **reliability** by **automating** manual tasks
